hard drives

DATASHIELD

1528 N. 16th Street
Omaha, NE 68110

*Serving the entire
Midwest Region*

Why are more and more organizations shredding hard drives?

Increasing evidence shows that sanitizing hard drives merely reduces your risk, it does not eliminate it. Combined with the fact that one data breach can affect tens of thousands of consumers; organizations – large and small – are falling victim to penalties, lawsuits, regulatory audits, and public relation damages costing billions of dollars each year.

As organizations are seeking increased information security, DataShield's NAID AAA Certified hard drive shredding is providing secure, environmentally safe, cost-effective, and permanent information disposal--leaving nothing to chance.

Our service is compliant with the ever growing list of regulations including:

- **HIPAA** – Health Insurance Portability and Accountability Act
- **GLB/Safeguards Rule** – Graham Leach Bliley Act
- **FACTA/Red Flag Rule** – Fair and Accurate Credit Transaction Act
- **FISMA** – Federal Information Security Management Act
- **EEA** – Economic Espionage Act
